Hello All,

DPH-LEA is working on it now and I should have more information for you by end of today.

Best regards,

Charlene

As a follow up to Dan's message below, can please you refer me to a contact over at the LEA? That would be very helpful in addressing solid waste issues at the site with CalRecycle.

Thank you for your assistance in this matter,

Jason Musante
Federal On-Scene Coordinator
U.S. EPA Region IX - Los Angeles

Hi Charlene – thanks for the message. One thing that would be helpful would be for LA DPH to request assistance from CalRecycle (Wes Mindermann) for assistance with the solid waste (ie, non hazardous) removal at the Fruitland Magnesium Fire Site.

Addressing the non hazardous component would expedite EPA's cleanup of the hazardous substances.

Best, Dan Meer

Subject: Fruitland Fire Site Cleanup

Hello Jason and Michelle,

After site walk on September 20th, the County requested a brief outline of terms that would be required by our environmental waste management specialists, Ocean Blue Environmental, to assist the U.S. EPA in cleanup of the Fruitland Magnesium Fire site located in Maywood.

Based on the scope of work described on 9/20/16, the County is unable to assist in solid waste removal or transport. If you would like to discuss this further, please feel free to contact us anytime.
